Accredited by
Accreditation Association
for Ambulatory Health Care Inc.

Welcome

Desert Orthopaedic Center Surgery Center (DOCSC) wants to thank you for using our facility for your outpatient surgical procedure. DOCSC is licensed by the state of Nevada as an Ambulatory Surgery Center. We have state of the art equipment and a dedicated, experienced staff to care for you. Please read the information below and visit our website for complete instructions at www.doclv.com to assist you in preparing for your upcoming surgery.

Instructions

A nurse will call you the day before surgery to give you pre-operative instructions and a list of necessary items to bring with you on the day of your surgery.

Children's Surgery

You may bring a favorite toy or blanket the day of surgery. You must remain in the building the entire time your child is here.

Before Surgery

Make sure you do not EAT anything after midnight (your surgery may be cancelled).

You may drink CLEAR liquids up to 4 hours prior to your arrival time (i.e. water, coffee, tea, juices without pulp, electrolyte drinks). **NO PROTEIN SHAKES OR DAIRY PRODUCTS.**

Don't chew gum or eat hard candy after midnight. It is recommended that you refrain from smoking

Shower and wash your hair before surgery to decrease the risk of infection.

If you think you may be pregnant, please notify your surgeon and anesthesiologist; medications and anesthesia may affect the developing fetus.

You will need an adult at least 18 years old to drive you home after surgery; please make arrangements in advance. It is helpful if a family member or significant other can be with you for 24 hours following surgery, especially if you have small children at home.

Do not take any medications after midnight unless instructed to do so by your physician or the nurse giving preoperative instructions.

Contact your surgeon or the Surgery Center if you are ill and need to cancel your surgery.

Day of Surgery

Please complete all pre-operative paperwork you received from your doctor's office.

Leave jewelry and valuables at home.

Please bring health insurance cards, cash and/or credit card payment, and your driver's license with you on the day of surgery.

Please bring a list of your medications to the surgery center, dosage and the last time taken with you on the day of surgery.

Wear loose, comfortable clothing.

You will need someone 18 years or older to drive you home after surgery.

After Surgery

You will be given instructions regarding your care at home before you leave the facility.

You may have prescriptions from your physician that will need to be filled. It is normal to feel drowsy after anesthesia.

We recommend for the first 24 hours following surgery that you do not operate equipment or drive, sign important papers, or drink any alcoholic beverages.

Children should not play on toys that move or roll.

What is Pain?

Pain is an uncomfortable feeling that tells you something may be wrong in your body. Pain is your body's way of sending a warning to your brain.

You have thousands of nerve cells and most of them can sense pain. When there is an injury to your body - in this case, surgery - these tiny cells send messages along nerves into your spinal cord and then up to your brain. Pain medicine blocks these messages or reduces their effect on your brain.

After your operation, your nurse will ask you about your pain because we want you to be comfortable. Be sure to tell your nurse if you have pain.

Pain Control Methods

1. Before Surgery

- Ask your doctor or nurse what to expect.
- Will there be much pain after surgery?
- Where will it occur?
- How long is it likely to last?

2. Being prepared helps put you in control.

- Discuss the pain control options with your doctor and nurse.
- Talk with your doctor and nurse about pain control methods that have worked well or not so well for you before.

- Talk about any concerns you have regarding pain medicine.
- Give an accurate health history including allergies and current medicine that you take.

3. After Surgery

- Pain medicine can be given to you through your IV, as a shot, or as a pill.
- Pain medication is used to control intense pain, NOT make you pain free.
- Other non - drug treatments for pain control which may help include: heat packs, cold packs, relaxation, music, massage and thinking about positive images.

DESERT
ORTHOPAEDIC
CENTER
Surgery Center

2800 E. Desert Inn Rd., Suite 150
Las Vegas, Nevada 89121
(702) 735-7355

Desert Orthopaedic Center Surgery Center (DOCSC) is committed to providing the highest level of patient care. To achieve this objective, we ask our patients or their caretaker to complete a brief patient satisfaction survey after their surgery.

To better serve you, we have automated this process. Within 48 hours of your discharge from our facility, you will receive an email providing you with a link to complete our survey. The survey is performed online via a secure internet connection to the independent company we have hired to gather survey results. Simply follow the instructions and give us your feedback. Patients who complete the survey online will be entered into a monthly drawing for a \$100 gift certificate to Amazon.com.

Please write legibly and provide the email address to forward the survey to in the lines below:

If you do not have access to email or a computer, please let us know and we will provide you with a paper version of the survey to complete and return to us.

Si usted quisiera la encuesta en español, por favor, háganoslo saber y nosotros le proporcionaremos una versión impresa de la encuesta para completar y regresarlo a nosotros.

We are committed to protecting the confidentiality of our patient's information and identities and under no circumstances will your information be disclosed or used for marketing purposes.

IMPORTANT – PLEASE READ

Billing and Charges

Institute of Orthopaedic Surgery, doing business as Desert Orthopaedic Center Surgery Center (DOCSC), is a separate legal entity from your doctor's office. Therefore, you may receive a separate bill from each.

All Surgery Center statements and insurance explanation of benefits you receive will reference Institute of Orthopaedic Surgery.

Ride Home

All patients must have a ride home with someone 18 years old or older. If you do not have a ride, please let your doctor know so we can help arrange a ride for you with an approved service.

If you are arranging a ride home through your insurance company, please ensure they are setting you up with a medical transportation because you will be receiving sedation. A ride-share service (such as Uber, Lyft, etc.) is not an appropriate option for this procedure, unless a friend or family member is accompanying you.

Failure to comply may result in your procedure being canceled.

If your insurance company is setting up a ride, they **MUST** understand you are having surgery and not just going to a doctor office visit. Please be sure to provide information to your doctor's office prior to your day of surgery to confirm your ride service has been cleared by our surgery center.

Should you have any questions, please contact your doctor's office or call and speak with a nurse or nursing supervisor at the surgery center, so we may assist you in scheduling a ride with an appropriate service.

Failure to comply may result in your surgery being cancelled.

PRE-OPERATIVE INSTRUCTIONS FOR SURGERY

1. **Nothing by mouth after midnight**, or as instructed by your surgeon.
 - a. No water, food, mints, chewing gum, etc. or your surgery will/may be canceled.
 - b. This is to prevent aspiration during surgery, which can be fatal.
2. If you normally take blood pressure or anti-seizure **medication** in the morning, ask your surgeon if you should take it the morning of surgery.
 - a. If yes, please take with a teaspoon of water immediately upon waking up.
 - b. Do NOT take blood sugar/diabetes medication in the morning unless instructed to do so by your surgeon. Should your blood sugar level be high, we will treat it at the surgery center.
3. **Do not smoke** the day of surgery and as long as possible prior to your surgery.
4. **Please be on time.** It will take approximately one hour to prepare you for surgery.
 - a. Surgeries may take a shorter or longer time than anticipated. You may be called to come in earlier than your scheduled time, so please have your telephone turned on. As well, your surgery may be delayed while you are here, as surgeries prior to yours may take longer than anticipated.
5. **Minor Patients** (under 18 years old)
 - a. A legal parent or guardian must remain in the surgery center the ENTIRE time the minor patient is here.
 - b. If someone other than the legal parent or guardian is with the child, the legal parent or guardian must provide written permission, along with a copy of their photo ID and a telephone number where they can be reached the day of surgery.
6. A copy of a **Power of Attorney** may be required if someone is signing for the patient.
7. Please **arrange for someone to stay** with you at least 24 hours after surgery.
8. **Bathe or shower** and wash your hair prior to surgery to avoid risk of infection.
9. Do not wear perfume, cologne, body lotion, hairspray.
10. Wear **loose, comfortable clothing**
 - a. Shoulder surgery: large button-up shirt
 - b. Knee or ankle/foot surgery: shorts, skirt, sweat pants
 - c. Easy-on shoes – no flip flops/thongs
11. Please **remove all jewelry, rings, piercings**, etc.
12. Leave all valuables at home or with your ride.
13. Do **bring a picture ID, insurance card and any copayment** you may have.
14. If you have an Advance Healthcare Directive, bring it with you.
15. **You must have someone 18 years old or older to drive you home.** If you do not have a ride, your procedure may be cancelled. You may not take a taxi, bus, Uber, Lyft, etc. unless you have someone you know over 18 years old with you.

We are located on the north side of Desert Inn between Eastern and Pecos-McLeod. Please see our web site for pre-operative forms and more information at www.doclv.com

FAQs (Frequently Asked Questions) About Surgical Site Infections:

Developed in accordance with Senate Bill 339 and Chapter 439 of the Nevada Revised Statutes

What are measures used at Desert Orthopaedic Center Surgery Center (DOCSC) to prevent infections?

- DOCSC prevents and controls infections within the facility through effective and nationally recognized infection control policies.
- All staff complete training in infection control, including aseptic technique and standard precautions, annually.
- All staff adhere to infection control policies and procedures implemented in the center, not limited to, but including, the proper use of required personal protective equipment, aseptic technique, high level disinfection and sterilization.
- Over the past 3 years, DOCSC has achieved an infection rate of 0.05% or 1 per 2,000 cases. All infections reported were included, regardless of outside contributing factors.
- As standard practice, DOCSC incorporates the use of IV antibiotics before surgery.
- Immediately before surgery, hair in the vicinity of the surgical site will be removed with electric clippers. Razors are not used as they present an infection risk by creating small nicks in the skin through which bacteria can enter.
- Bair Hugger® Therapy units are used to maintain ideal body temperature as patients who are kept warm resist infection better.

What processes are used to determine whether a patient has an infection upon or prior to admission to the medical facility?

- Patients are routinely contacted the day before their procedure regarding their health and a pre-operative interview is performed by nurses and physicians.
- Prior to your surgery, your surgeon may have you tested for methicillin-resistant Staphylococcus aureus (MRSA). The test is simple, usually just a nasal swab. If you have it, extra precautions may be taken to protect you from surgical site infection.

How is it determined whether an infection has been acquired?

- Only your physician can diagnose whether an infection has occurred. However, if you note any of the following, call your doctor immediately:
 - Redness and pain at the surgery site
 - Drainage of cloudy fluid

- Fever over 101°F or shaking chills

What are the risk factors for acquiring infections?

- Health problems such as allergies, diabetes, and obesity as well as hematocrit levels less than 36 can create an elevated risk of infection. Be sure to discuss these with your doctor.
- Stop smoking well in advance of your surgery. Patients who smoke are three times as likely to develop a surgical site infection as nonsmokers, and have significantly slower recoveries.
- After your surgery, family and friends should not touch your surgical wound or dressings and they should wash their hands before and after visiting.
- Those caring for your wound should always wash their hands before and after contact.

General information on preventing facility-acquired infections:

- Ask that medical staff clean their hands before treating you, and ask visitors to clean their hands also. This is the single most important way to protect yourself in a medical facility. All caregivers should clean their hands before treating you. Alcohol-based hand cleaners are more effective at removing most bacteria than soap and water.
- If your doctor or nurse uses a stethoscope or other diagnostic device, ask that the surface be wiped with germicidal cleaner.
- Shower before any procedure and consider showering or bathing daily with chlorhexidine soap beginning three to five days before surgery. Various brands can be bought without a prescription. It will help remove any dangerous bacteria you may be carrying on your own skin.
- Avoid touching your hands to your nose, mouth, or eyes and do not set food or utensils on furniture or bed sheets. Germs can live for many days on surfaces and can cause infections if they get into your mouth.

PATIENT RIGHTS

Desert Orthopaedic Center Surgery Center (DOCSC) recognizes the basic human rights of patients, with respect for property and person, including:

The patient's right to respectful, considerate and dignified treatment in a safe and secure setting, being free to exercise their rights without being subjected to any form of abuse, harassment, threat, discrimination or reprisal.

The patient's right to treatment without regard to race, ethnicity, national origin, religion, sex, age, current or anticipated mental or physical disability, sexual orientation, or genetic information.

The patient's right to complete information concerning their diagnosis, evaluation, treatment and prognosis to the degree known. When it is medically inadvisable to give such information to the patient, the information is provided to a person designated by the patient or to a legally authorized person.

The patient's right to Information necessary to give informed consent prior to any procedure and/or treatment. No care will be provided without patient consent.

The patient's right to confidential handling of disclosures and records and, except when required by law, is given the opportunity to approve or refuse the release of their medical records.

The patient's right to appropriate assessment and management of pain.

The patient's right to appropriate personal privacy during the course of their physical care.

The patient's right to participate in their healthcare decisions, except as medically contraindicated.

The patient's right to know in advance the expected estimated amount of his/her patient financial responsibilities and the right to examine and receive an explanation of his/her statement of charges regardless of the source of payment.

The patient's right to know who is counseling, caring for or treating them. The practitioner's name and professional qualifications shall be visible or stated on introduction.

The patient's right to information regarding the services available at the Center.

The patient's right to information concerning patient conduct and responsibilities.

The patient's right to express their spiritual beliefs and cultural practices, as long as these do not harm others or interfere with treatment.

The patient's right to consent or refuse to participate in experimental research.

The patient's right to be free from chemical restraints and exclusion, except as authorized by a physician or in an emergency when necessary to protect his/her self or others from injury.

The patient's right to voice grievances regarding treatment or care that is, or fails to be, furnished.

The patient's right to recommend changes in policies and services to the staff and governing body.

The patient's right to change providers if other qualified providers are available.

I have received this information both verbally and in writing in advance of the date of my procedure.

PATIENT RESPONSIBILITIES

Patient responsibilities require the patient to:

- Provide complete and accurate information to the best of his/her ability about his/her health and any medications, including over-the-counter products and dietary supplements and any allergies or sensitivities. Provide accurate and complete medical history and treatment information.
- Follow the treatment plan prescribed by his/her provider.
- Provide a responsible adult to transport him/her home from Desert Orthopaedic Center Surgery Center (DOCSC) and remain with him/her for 24 hours, as required by his/her doctor and/or the DOCSC staff.
- Inform his/her provider about any living will, medical power of attorney, or other directive that could affect his/her care.
- Accept personal financial responsibility for any charges not covered by his/her insurance, and assure all payments for services rendered are on a timely basis.
- Be respectful of all the health care professionals and staff, as well as other patients.
- Participate in his/her healthcare decisions.
- Read and understand all permits and/or consents before signing.
- Carefully read and follow the pre- and post-operative instructions, and keep appointments.
- Communicate any post-operative complication(s), or worsening condition with the physician.
- For minor patients, the responsible parent, legal guardian or person must remain at DOCSC. If the responsible person is not the parent or legal guardian, DOCSC requires the parent's / legal guardian's written permission, contact information, and a copy of their photo ID.
- Notify either the DOCSC Administrator or Supervisor if he/she feels any Patient Rights have been violated; or has a complaint or suggestion to improve services or care. The DOCSC patient satisfaction survey may be completed or direct or telephone contact may be made.

I HAVE READ AND UNDERSTAND THE ABOVE.

PATIENT IDENTIFICATION

**Patient Informed Consent to Resuscitative Measures
(Not Revocation of Advance Healthcare Directive or Medical Power of Attorney)**

You have the right to accept or refuse medical or surgical treatment, and to participate in your healthcare decisions. You may complete and sign an Advance Healthcare Directive or a Power of Attorney authorizing others to make decisions for you, based upon your wishes, if you are unable to otherwise make or communicate your decisions. Desert Orthopaedic Center Surgery Center (DOCSC) respects and upholds those rights and references Nevada Revised Statutes 449.628 in the declaration of the following policy. A link to the Nevada Division of Health Care Financing and Policy can be found on the DOCSC Web site at www.doclv.com, where you will also find more information on Advance Healthcare Directive. DOCSC has Advance Directive forms available upon request.

Desert Orthopaedic Center Surgery Center does not routinely perform high risk procedures like an acute care hospital. While no surgery is without risk, those performed at DOCSC are considered to be of minimal risk. The specifics of your procedure, including the risks, recovery and aftercare, will be discussed with your surgeon.

Therefore, it is DOCSC policy, regardless of any Advance Healthcare Directive or instructions from a Health Care Surrogate or Attorney, that if an adverse event occurs during your treatment at DOCSC, resuscitative or other stabilizing measures will be initiated and you will be transferred to an acute care hospital for further evaluation. At the acute care hospital, further treatment, withdrawal of treatment or withdrawal of treatment measures already begun, will be ordered in accordance with your wishes, Advance Healthcare Directive, or Health Care Power of Attorney. Your signature, below, does not revoke or invalidate any current Health Care Directive or Health Care Power of Attorney.

If you do not agree with this policy, we are pleased to assist you in rescheduling this procedure. Otherwise, **please initial the appropriate box below.**

- Yes, I have an Advance Healthcare Directive, Living Will or Healthcare Power of Attorney.
- No, I do not have an Advance Healthcare Directive, Living Will or Healthcare Power of Attorney.
- I would like Advance Healthcare Directive information.

By signing this document, I acknowledge I have received this information both verbally and in writing in advance of the date of my procedure.

“Notice to Patients Regarding the Destruction of Health Care Records”

Desert Orthopaedic Center Surgery Center (DOCSC) follows the following guidelines in the storage of patient health care records pursuant to the provisions of subsection 7 of NRS 629.051 (SB17):

- The health care records of a person who is less than 23 years of age may not be destroyed; and
- The health care records of a person who has attained the age of 23 years may be destroyed for those records which have been retained for at least 5 years or for any longer period provided by federal law; and
- Except as otherwise provided in subsection 7 of the NRS 629.051 and unless a longer period is provided by federal law, the health care records of a patient who is 23 years of age or older may be destroyed after 5 years pursuant to subsection 1 of NRS 629.051

My signature validates that I have received this notice and that my health care records may be destroyed without further notification in accordance with the guidelines above.
